PROJECTS AND RELEVANT EXPERIENCE

Smoke / Web Based I/O Testing in Any Language

- Designed a multi-container web application for the education sector to streamline grading of programming assignments through simple I/O tests.
- Developed a ruby container to run alongside the web server to sandbox the execution of input code. Maintained communication through a JSON API.
- Developed strategies for my team and I to effectively communicate and work together. Designed our Git Flow strategy, maintained our Trello board, and used Microsoft 365 to consolidate resources.
- Worked in small groups to learn the practices of Scrum and the Agile Manifesto in two-week sprints. Rotated through all Scrum positions.

Charles Schwab / College to Careers / October 2019

- Learned how to amplify natural talents into strengths.
- Focused on developing professional skills.

EDUCATION

Metropolitan State University of Denver / Computer Science / Current

Junior / Expected graduation: Spring '21 / 3.76 GPA

- Functional Programming, Web Applications, Software Development Methods and Tools, Principles of Programming Languages.
